Medium Articles Author: <https://medium.com/@tejasitankar94820>

D.J Sanghvi College of Engineering (DJSCE)
B.Tech in Information Technology |

August 2020 – June 2024
CGPA: 8.874

Experience

BNP Paribas ISPL

June 2024

Associate Software Developer

Typescript, Java, Selenium, python

- Contributed to the Java backend of the **Jgestab** application, a migration project moving from a traditional **Paradox** system to a web-based UI for database management. Worked on the application's **rule engine**, the core component for managing multiple bank database tables.
- Led the automation of the Atlas 2 Portal, a core banking application managing major transactions. Migrated from **UFT to Java and Selenium**, eliminating licensing costs while ensuring seamless functionality and test case integrity.
- Collaborated with a team to integrate Generative AI into developer and tester workflows, working on the Continue plugin in VS Code to assist developers in coding.
- Contributed to a use case for **converting UI user stories into structured test cases**, automating them with Selenium (Java), and managing the workflow using Bitbucket and JIRA. This project is in its initiation stage, as the AI models are still in early development within the bank.

Internships

Highway Delite

May. 2024 – June 2024

Full Stack Developer

Typescript, NEXTJS, NESTJS, Postgresql

- Developed location-based service APIs using Google Maps APIs and PostGIS, and migrated the Agent Reporting Server from PHP to Nest.js & Next.js, optimizing SQL queries.

D.K Academy Pvt Lmt

Oct. 2023 – Mar 2024

Mern Stack Developer

Typescript, NextJS, Tailwind CSS, MongoDB

- Implemented OAuth2.0, 2FA (OTP-based authentication), secured AWS S3 storage, and deployed the app using AWS EC2 (backend) and Vercel (frontend) with a custom domain setup.

Atmospark Technologies (Freelance)

Nov. 2023 - Dec. 2023

Mern Stack Developer

Javascript, NextJS, Bootstrap CSS, MongoDB

- Built shopping cart, Stripe payment integration, and Figma-based UI, while integrating MQTT server on AWS with WebSockets.

Astro Vistaa Pvt lmt

Aug. 2022 - Dec. 2022

Node Backend Developer

JavaScript, Nodejs, MongoDB, Git, GitHub

- Developed real-time chat using WebSockets and integrated Exotel webhooks for call tracking and automated notifications.

Projects

Handwritten Equation Recognition System

Python, TensorFlow, Google colab , keras

- The Aim was to build an Deep Learning Neural Network Model to detect and convert handwritten Maths Equation Image to latex format. Used algorithms like RNN(Recurrent Neural Networks), LSTM, Encoder + LSTM. In Encoder we Tried to Use Resnet-50, Xception, VGG-16, VGG-19 transfer learning algorithms.
- Finally, Attention based Encoder (**Resnet-50**) - Decoder (**Transformer**) Model is found to give maximum accuracy to convert equation images to latex which gave us Validation Accuracy of **74%**.

Hackathon

Winner of Domain (Data Analytics) in hackathon DATAHACK 1.0

Mar. 2023

- Won Data Analytics domain in DATAHACK 1.0 by predicting used car prices with **98%** accuracy using **XGBoost** for price prediction and VGG (Transfer Learning) for damage detection, leveraging data scraped from CarWale and Cars24.

Skills

Languages, Technologies & Tools:

- Javascript(ES6), Typescript, Java, python, SQL, DSA, DBMS, OS, Computer Networks, System Design concepts
- ReactJS, NextJS, MongoDB, ExpressJs, JWT Tokens, Docker, Linux, Tensorflow, Keras, Opencv.
